Restructuring Proposal for TAURER Russia

Dear colleagues and management of TAURER company in Russia,

We are pleased to present you with a new proposal aimed at improving the operations of our branch and ensuring its stable development.

In light of the current situation in some of TAURER's projects in Russia, we propose to undergo a complete restructuring of our division.

This proposal includes the following changes:

- Our company is shifting its focus from amateur television to professional broadcasting. This will allow us to expand our projects and reach new heights in the industry.
- The company will no longer cater to the amateur market for any products. Henceforth, all products will undergo strict regulatory control.

Collaboration in the new format entails significant changes in the structure of our staff. Through the integration of advanced artificial intelligence technologies, we can now perform many tasks more efficiently and promptly.

In connection with this, we propose the following recommendations:

- Each project will have an optimal team consisting of 3-5 members, ensuring efficient project management and maximum productivity.
- We set the minimum age for participation in projects at 16 years old to provide young talents with the opportunity to demonstrate themselves early and gain valuable work experience.
- Before joining a project team, each candidate must undergo proficiency and adequacy testing to ensure the high professional level of our team.

These changes will enable us to effectively adapt to new challenges and ensure the successful development of our projects.

Restructuring Proposal for TAURER Russia

The remaining operations and key decisions will be carried out using artificial intelligence, allowing us to enhance the efficiency and quality of our projects.

To enact this decision, the support of 3 out of 6 branch managers or board members of Taurer Media Alliance is required.

We are confident that the proposed changes will help us adapt to current challenges and achieve new successes. Thank you for your attention, and we look forward to your discussion of this proposal.

CEO «Taurer Media Alliance»
